

G&M Welcomes Patrick Byrne & Associates and its staff

The staff of Patrick Byrne & Associates (PBA) has joined Gausman & Moore's Los Angeles office. PBA's clients will continue to receive the same personal service from Mike Fineberg and his staff, but with the support of a stronger, more diverse MEP firm. PBA's experience in aviation, biotechnology, and mixed use will enhance Gausman & Moore's already diverse portfolio in education, government, hospitality, commercial, institutional, retail, office, healthcare, recreation and worship. We can now offer PBA's clients specialty services like sustainable design, mission critical, forensic, and fire protection engineering as well as integrated audio, video, and data network design.

G&M Welcomes Patrick Byrne & Associates

Understanding LEED M&E Credits

Kunle Olofinboba promoted to Principal

2008 Most Valuable Player -- Tim Culbertson

U of M --Duluth Labovitz School of Business & Economics--LEED Gold

Gausman & Moore offers insight into LEED® M&E Credits

Beginning February 25, we will offer two-hour seminars on earning LEED® M&E credits to our clients (your office or ours) that will explain how to earn M&E New Construction 2.2 credits. Who should attend: Anyone studying for the LEED® AP exam or Accredited Professionals who want a better understanding of how M&E credits are earned and what they cost. For information contact Mark Leutgeb at 651-604-3141 or mleutgeb@gausman.com.

Kunle Olofinboba promoted to Principal

Kunle joined our team as a summer intern in 2000. He joined us full time in June 2001 and proved himself as an insightful, hands-on project manager. In 2006 Kunle relocated to the Los Angeles area and currently manages our Los Angeles office.

NOTE WORTHY

Recent LEED® Accredited Professionals

Edward L. Studniski, P.E.

Mark V. Leutgeb
Elizabeth G. (Betsy) Reed, P.E.
Blake D. Guither
Daniel J. Fox, P.E.
Blayne J. Parkos, P.E.
Derek R. Sachs, P.E.

Twenty-one more people have completed in-house training and are scheduling their tests.

Tim Culbertson 2008 Most Valuable Player Mechanical Department, St. Paul Office

Great teams are made up of members whose strengths, although very different, complement one another and contribute to the common goals of the team--people whose strengths fall into one of three categories:

Finders, Grinders and Minders. Finders bring in business; Grinders perform the work; and Minders keep clients satisfied. Tim is one of those unique individuals whose strengths are equally balanced in each of these areas. As a Finder, Tim has identified projects and prepared and delivered proposals with successful results. As a Grinder, Tim is a hands-on designer. As a Minder and project manager, Tim keeps clients informed of the status of their projects and potential challenges. Clients

who work with Tim know their projects are managed in a professional manner and completed to their satisfaction. Tim's work ethic and positive attitude embody our commitment to Exceptional Client Service.

University of Minnesota—Duluth Labovitz School of Business and Economics Earns LEED® GOLD Status

G&M provided complete MEP and data communications services for this 67,000 sq.ft. three-floor facility, which is the first higher education building in Minnesota to be LEED® Certified with Gold status. Visit the USGBC Mississippi Headwaters Chapter for more information about this project.
