Project Experience

Madame Tussauds Hollywood

Madame Tussauds is a new attraction, currently in construction, is located on historic Hollywood Boulevard in Hollywood, California, next door to the famous Mann's Chinese Theater. The project includes a three story building with façade of architectural CMU and glass, over two levels of underground parking. This project includes interactive theme exhibits.

Hollywood, California

El Capitan Theater

This 1926 era movie palace, was restored in great detail. Electrical design including new L.A. D.W.P. substation, installation of theatrical lighting and sound system, and restoration of a 150 HP organ blower system was provided.

This project won the Electrical Excellence Award from NECA.

Hollywood, California

Duluth Entertainment and Convention Center Harbor Side Addition

Gausman & Moore provided complete mechanical and electrical design including lighting and sound system design. A 12,000 sq.ft. Ballroom overlooks the harbor with additional meeting space and a preparation kitchen on the second level and retail shop on the street level. The project required relocation of cooling, fire protection and ventilation equipment that served the existing building.

Duluth, Minnesota

ENTERTAINMENT / HOSPITALITY

Project Experience

University of Minnesota Duluth Weber Music performance Hall

Duluth, Minnesota

Gausman & Moore designed the mechanical and electrical systems for this Cesar Pelli designed state of the art music performance hall. The acoustical design criteria impacted the ventilation system and electrical systems. The building is fed by campus utility systems for steam, chilled water, compressed air, power and communication. Medium voltage transformer/switch vault was reconstructed to provide service power to both existing campus buildings and new Performance Hall.

Hollywood Orange, LLC

Hollywood, California

This 1926 era movie palace, was restored in great detail. Electrical design including new L.A. D.W.P. substation, installation of theatrical lighting and sound system, and restoration of a 150 HP organ blower system was provided.

This project won the Electrical Excellence Award from NECA.

Maplewood Community Center

Maplewood, Minnesota
